 **NEW**

UP&DOWN

TABLE BASE

Features and functions:

- A table base consisting of a single leg made of a chromium plated or powder coated metal tube and powder coated cast iron foot.
- Adjustable table height – compatible both with standard chairs, as well as bar stools.
- Recommended also for conference rooms. In its higher position it may serve as a stand for a projector or as a high catering table. When lowered, its height matches conference chairs and may be used as a place for training materials.
- Height adjustment of a table top by means of a gas lift.
- The specifically chosen strength of a gas lift makes it easy to pull the table top upwards on the one hand; on the other hand the table top goes downwards only if some force is applied to the table top. Thus, the high position of the table is safe for using.
- Compatible with Werzalit, TOP 36 and TOP 50 melamine table tops.

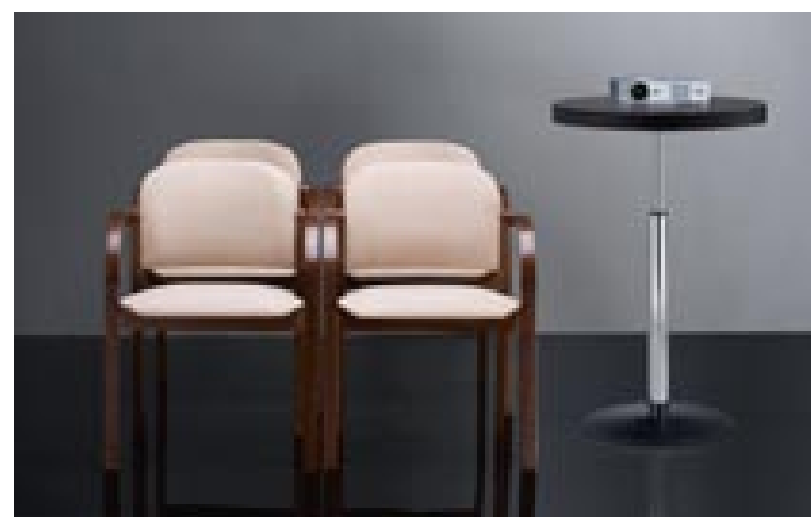

a gas lift to adjust the table height
